Masters in CS Student @ UCSD, Ex - SWE at Microsoft

shebbureshwar@ucsd.edu

EDUCATION

University of California, San Diego, CA

Sept 2022 - Mar 2024

Master of Science in Computer Science student.

CGPA 4.0/4.0

Research Assistant at Center for Energy research [DERConnect](#) - Kafka, Telegraf, InfluxDB, MQTT, NodeRed

EXPERIENCE

Software Engineer, Microsoft

React | TypeScript | Full Stack | Azure

July 2020 - Aug 2022

- As a full stack developer, leveraged React.js, Angular and C# to build recruitment tools for global hiring at Microsoft. Designed and implemented crucial components such as dashboards, forms and grids.
- Worked extensively with Microsoft **Azure** to deploy webapps, build pipelines automating a variety of tasks, handle scaling, certificate, secret management etc.
- Improved the load time of the Webapp by 40% using module splitting and effective caching. Implemented the HEART telemetry, error handling and unit testing frameworks for the front-end repository.
- After gaining expertise in React, being the lead developer for front-end, managed the new hires to assign pieces of work and deliver new features.

Software Engineer Intern, Nokia

System Design | Angular | Authentication

June 2023 - Aug 2023

- Played a pivotal role in the system design and development of an automated frequency controller, efficiently handling a high volume of requests, averaging 10 million per day.
- Engineered a state-of-the-art UI map visualization system, proficient in rendering and managing millions of data points. This included dynamic functionalities like grouping, layering, and clustering, all with sub-second latency, utilizing the Angular framework.

Software Engineering Intern, Microsoft

NLP | Python3/Flask | Docker

May - July 2019, Jan - June 2020

- Worked on a project to quickly match talent to jobs. The aim was to increase the productivity of the recruiters by reducing the manual work of going through hundreds of resumes.
- Leveraged NLP techniques like Named Entity Recognition (NER) and Word Embedding models (word2vec) to create a pipeline in Python3/Flask for matching talent pool with job openings.

Successful completion of internship leading to a PPO from Microsoft.

Microsoft Azure

HTML, CSS

PROJECTS

SurfStore

Golang | Consistent Hashing | RAFT | gRPC

Created a cloud based file storage service called SurfStore. A networked file storage application that is based on Dropbox, and lets you sync files to and from the “cloud” . Implemented the cloud service where the client interacts with it using gRPC. The cloud service was implemented in a distributed manner and fault tolerant way in **Golang**.

RVSAFE — *Are we safe? (Microsoft Imagine Cup)*

Disaster management platform to empower rescuers and victims before, during and after disasters.. Provided valuable life saving features to both the rescuers and victims, such as the optimal route emergency staff would take to reach victims.

We presented this project for Imagine Cup and were the [winners](#) from India in 2019

Project demo:  [RVSAFE - codefundo++ finals](#)

ACHIEVEMENTS

- Microsoft Imagine Cup Asia regional finalists 2019.

One of the top three teams from India to reach the Asia finals. Considered as one of the top competitions and awards related to technology and software design, it was an eye opening experience competing worldwide and presenting the idea of RVSAFE to the judges at Sydney.
- Winner of “Early in Career Hack” conducted at Microsoft for all the new hires. The idea of leveraging natural language processing to gauge the sentiment of an interview and obtaining a summary was highly appreciated by the leadership team.
- Runner up of CISCO IOT hackathon conducted by CISCO at RVCE (2/300 teams).
- Second Runner Up at Hackathon 2018 conducted by Rakuten India where we competed against 330 teams from all over India (3/330 teams from all over India).
